Advances in the mechanism of Traditional Chinese Medicine by network pharmacology method

XING Xinrui, LÜ Diya, CHAI Yifeng, ZHU Zhenyu (School of Pharmacy, Second Military Medical University, Shanghai 200433, China)

[Abstract] Network pharmacology is the basis of system biology, systematically expounded the interaction of the principle and regulation between body and the drug, representing the idea of the modern biomedical philosophy and researching model. It could be more easily understand the mechanism of action of Traditional Chinese Medicine treatment of diseases by the network pharmacology-related technical means. Network pharmacology is widely used in Traditional Chinese Medicine research in the current. The application and development of network pharmacology in the field of Traditional Chinese Medicine research in recent years were introduced in this paper from the aspects of Traditional Chinese Medicine concept, network pharmacology and network pharmacology application.

[Key words] network pharmacology; Traditional Chinese Medicine research; mechanism of action

网络药理学是系统生物学的基础，系统性地阐述了机体与药物之间相互作用的原则和调节，代表着现代生物医学哲学和研究模型。它可以通过网络药理学相关的技术手段，更易于理解中药治疗疾病的机制。网络药理学在当前的中医药研究中得到了广泛的应用。本文从中医药概念、网络药理学和网络药理学应用等方面，介绍了近年来中医药研究领域网络药理学的应用和发展。
